

Evaluation Criteria 2024

The submission is open to planned (didactic) projects or planned research projects.

Marking criteria as used by the jury	Weight	5-point scale (from "not met" to "met")
Promotion of postgraduate training in line with the strategy of the SIWF The current focus of the SIWF's/ ISFM's activities is on the following topics: Competency-Based Medical Education (CBME), Entrustable Professional Activities (EPA), Faculty Development, Planetary Health, training in outpatient settings, continuity between undergraduate and postgraduate training, and the " General objectives ". Submissions on other topics are possible, provided that the relevance for postgraduate training is justified. In all projects, it should be explained whether or how the trainees' perspective is taken into account.	1	
Relevance for postgraduate training in Switzerland The project idea either represents an innovation or solves a problem. The problem statement must base on (Swiss) data and the international literature. Didactic projects and research projects must be relevant to medical training in Switzerland.	2	
Clearly formulated project goal / clearly formulated research question The goal/research question is formulated concisely and comprehensively.	1	
Appropriate methodology The planned (didactic) methods are appropriate for the project goal / research question.	1	
Feasibility of the project The project description is comprehensive and realistic, including the timing.	1	
Transferability Transferability of the project or the results to other healthcare professions, further training settings and other language regions, is encouraged. An evaluation plan is expected, including development, refinement, and dissemination of the project. In the case of research projects, the impact of the results at the Swiss or international level should be described, as far as possible.	0.5	
Formal criteria		
Postgraduate training At least one of the applicants is in postgraduate training or is responsible for postgraduate training at a recognised Swiss site for postgraduate medical training.		Yes / No
Comprehensible budget The budget must appear comprehensible and realistic. The maximum frame is 60'000 Swiss francs. If only partial funding is requested, the other sources of funding, in addition to the SIWF/ISFM, must be indicated. It has no bearing on the assessment whether the financing is full or partial.		Yes / No
